A message from our CEO

Dear students,

At SpecBits, we're not just in the business of transforming careers; we're in the business of changing lives. I understand the challenges you face when searching for the right job and the frustration of not having the skills needed to excel in the tech industry. That's why we've built SpecBits Career.

Our promise is simple: we provide you with the training, knowledge, and connections to land your dream job. We're dedicated to nurturing your growth and ensuring your long-term success. As we continue to grow, we remain committed to our mission of empowering individuals like you to unlock your full potential. Join us on this incredible journey and let's build a brighter future together.

Welcome to Specbits, where your dreams become your reality.

Best regards,

Ashok kr. Tiwari

Programme Overview

○ Course Overview

Become a full stack web developer using the best tools and technologies out there - MERN. By the end of this course you will gain the mastery over nodejs, reactjs and advanced HTML & CSS which will enable you to create attractive and responsive web applications for all intents and purposes.

○ Features

Why Choose SpecBits?

- SpecBits Full Stack web development can make the development entire process smooth.
- Learn the best practices of converting data to a graphical interface, through the use of HTML, CSS, and JavaScript.
- Learn the basic of adding server-side logic in any web application using Laravel

Course Outcome

Introduction To Programming ○

Learn the basics of the most popular programming languages (React.js & Laravel) and become an expert in the core fundamentals of programming.

Data Structures And Algorithms ○

Data structures and algorithms are all about organizing information and finding the most efficient approach to solve a problem. Learning these concepts will, in turn, help you improve your problem-solving skills and enable you to tackle real-world problems using technology.

Front end Web Development with React ○

Learn the best practices for converting data into a graphical interface through the use of HTML, CSS, and JavaScript. Build amazing user interfaces (UI) or UI components using the React library. Improve your skills in creating visually appealing and functional UI designs that enhance the overall user experience.

Backend web development with Laravel ○

Learn the basics of adding server-side logic to any web application using Laravel
